Petition to End Water Poverty

I support the End Water Poverty campaign calling for sanitation and water for all. It is a scandal that 2.5 billion people live without access to a safe toilet and almost a billion are still waiting for clean water.

To tackle a crisis that kills 5,000 children every day, we urgently need your support for a *Global Framework for Action* that fulfills these most basic of rights. As part of this framework:

- **Developing countries should create national plans that deliver sanitation and water to all.**
- **Donor countries should ensure that no credible plans fail for a lack of finance.**
- **International systems to be established to monitor and drive progress – including an annual review, a global task force and an annual high-level meeting.**

It really pays to invest in sanitation and water. For every $1 spent on these services, an economy gains an estimated $8 through better health, education and productivity. Doing nothing is costing too much. Please act now to End Water Poverty.
